PROFESSIONAL SUMMARY

14-year full-stack developer experienced in designing and deploying innovative, client-centric solutions with a strong focus on cloud-based and AI applications. Skilled in front-end and back-end integration, API development, and prompt engineering to maximize AI capabilities. Known for a unique approach to vibe coding, blending intuition, creativity, and pragmatism for impactful product delivery. Proven track record in agile environments and a commitment to leveraging emerging technologies for purposeful solutions.

CAREER OBJECTIVE

As a seasoned software engineer, I leverage my expertise in Python, Node, and AI Agents Development to drive innovation and deliver high-impact solutions, aiming to lead cross-functional teams and architect scalable systems that transform businesses. I strive to utilize my technical prowess to foster growth and excellence in a forward-thinking organization.

EXPERIENCE

Freelancer

Self-Employed | Aug 2023 - Present | Hyderabad

Freelance work focused on developing various applications including tax assistance, consultation platforms, crypto wallets, event management, and employee assessment systems.

- Build an AI US TAX assistant desktop application where internal sales executives use US Tax assistance through the application, allowing users to communicate and support TAX related queries instantly while conversing with customers over the calling process.
- Built B2C United States Tax Consultation platform where Customers, Tax Professionals along with Admin Dashboard with features like role based authentication system, email notification system, and document management.
- Developed a comprehensive Crypto Wallet and Trading Platform featuring a mobile-friendly responsive UI and robust backend API integration.
- Engineered an event management software and website with integrated AI Chatbot for user management, event and invitation creation, and vendor management.
- Implemented Employee Assessment Platform with features such as admin-led registration, dynamic question and answer modules, employee scorecards, exam submissions, comprehensive reporting, and time tracking analytics.

Lead Software Engineer

Solugenix India | Jul 2022 - Jul 2023 | Hyderabad

Led software engineering efforts for client projects, focusing on UI development and API integration in an Agile setting.

- Directed UI development and Node API integration for Marsh Amazon DSP Insurance Product and Bluestream applications in an Agile environment.
- Supervised testing and quality assurance using Jasmine for UI and Mocha for API, while coordinating Angular upgrades for enhanced system scalability and maintainability.

UI Lead

Innover Digital (Formerly NLB Services) | Sep 2020 - Jul 2022 | Hyderabad

Led UI development and Agile processes for internal products, ensuring high-quality code and effective team collaboration.

- Designed and developed UI code for internal product development, focusing on workflow management for Thomson Reuters.
- Facilitated Agile sprints as Scrum Master, ensuring code testability with the Cypress framework.

Sr. UI Developer

Perigord Data Solutions | Aug 2019 - Sep 2020 | Hyderabad

Focused on UI development for pharmaceutical products, enhancing legacy systems with modern frameworks.

- Developed UI frameworks for legacy products in the pharma domain, implementing localization support with AngularJS.
- Collaborated with the .NET team for API integration.

Development Lead / Manager

Art Republic / FLUJO | Sep 2017 - Aug 2019 | Hyderabad

Oversaw product development initiatives, focusing on delivering tailored solutions for startup clients.

- Managed product development for SaaS-based startups, delivering custom features like web builders, bulk email/SMS, and social media management.

Sr. Software Engineer & Analyst

Surgical Information Systems | Dec 2014 - Sep 2017 | Hyderabad

Developed health management software, enhancing patient care through technology.

- Implemented Hospital / Patient Health Management software using AngularJS, TypeScript, and NPM Packing Manager.
- Contributed significantly to Agile development processes.

Team Lead & Manager

ACT / Beam Telecom | Jun 2013 - Aug 2014 | Hyderabad

Managed web portal development and payment system integration, improving customer service operations.

- Led the design and implementation of a fully meshed ISP web portal and payment gateways.
- Integrated the first online payment system with the HDFC Payment gateway.
- Developed an internal product called 'Strategy In Action' for employee task tracking and goal setting.

Team Lead / Manager

Kiosk Mint Networks | Apr 2008 - May 2013 | Hyderabad

Led product design and development, focusing on payment systems and digital signage solutions.

- Integrated the first online payment system with the HDFC Payment gateway.
- Developed an internal product called 'Strategy In Action' for employee task tracking and goal setting.
- Designed and developed the Flight information display system with flash ActionScript 3.0 for GMR Airport Buses.

SKILLS

Python - 65% (4 years)
